

Connect devices anywhere,
anytime with our global IoT
connectivity solution.

Start your IoT project easily with us.

Our proposal to your business:

Global coverage

- Roaming agreements with 500+ operators worldwide unleashing a unique experience anywhere in the world
- Non-steered SIM cards: automatic and instantaneous selection of the best network available everywhere
- Cellular connectivity based on 2G/3G/4G/LTE-M (Data, Voice & SMS)

Access to advanced management tools

- With access to advanced diagnostic solutions, analytics and automation platforms, POST Telecom empowers you to remotely monitor and manage your e/SIMs, in full transparency. Real time alerting, rate plan optimization and billshock prevention.

SIM and eSIM cards adapted to your business needs

- Ultra-durable SIM cards capable of handling any environmental exigences (humidity, dust, temperature,...)
- Customizable SIM with your company logo
- Half size SIM available
